

Solar energy for homes new zealand

Overview

Systems of 3–5 kilowatts can work well financially for typical New Zealand households, and cost around \$8,500 to \$11,500 (incl. A system in this size range can produce around 4,000 to 6,500 kilowatt hours (kWh) of electricity per year. One of the first decisions you'll need to make is what type of solar system best fits your lifestyle, property, and energy needs. Grid-Tied. Home solar panels offer a powerful solution. Is Your Roof Suitable?

The direction and pitch of your roof significantly affect how well your solar system performs. There are small-scale systems available to enable you to generate your own power, store it and sell it back to the grid. This environmentally friendly solution not only reduces reliance on fossil fuels but also lowers electricity bills and contributes to.
