

Solar generator screen does not display

Nominal Capacity

280Ah

Nominal Energy

50kW/100kWh

IP Grade

IP54

Overview

Most display issues can be resolved by performing a hard reset (fully removing power from the generator). For information on the proper procedure, see: [How Do I Perform a Hard Reset on a Home Standby System?](#)

Note: Disconnecting the battery alone will not reset the control panel. This article explores. Many Generac home standby generators feature a control panel with a display screen and navigation buttons. The screen should flash or blink to indicate the currently selected menu option. You're not alone—many users face this common issue.
