

# Solar grid-connected solar panel prices

## Overview

---

Grid-tied solar dominates the market for good reason: With 2025 system costs ranging from \$2.00 per watt installed and federal tax credits of 30% through 2032, grid-tied systems offer the fastest payback periods (6-10 years) and highest returns on investment without requiring expensive. With Unbound Solar's pre-wired grid-tie systems you'll be able to see what components are needed for your system and a ballpark figure of what you might expect to pay. These figures don't include the 26 percent Federal Tax Credit you'll receive for investing in renewable energy. It allows homeowners, small building owners, installers and manufacturers to easily develop estimates of the performance of potential PV installations. Your actual cost depends on your home's energy needs, roof characteristics, location and other factors, all of which we'll break down in. Compare loan, lease, and purchase options for your solar panels based on your results.
