

# Solar power generation system self-made

## Overview

---

To build a solar generator, you'll need a solar panel, a charge controller, a deep-cycle battery, and an inverter. The panel collects sunlight, the charge controller manages the flow of power to the battery, and the inverter turns that stored power into electricity you can. Portable, weatherproof, and ready-to-rock — a homemade solar generator can meet all your power needs in and around your boat, camper, or cabin. You don't need to be an expert to build one. With a few tools and some basic knowledge, you can create a reliable source of energy. But where do you start?

This guide explains everything you need to build your own power system, step by step, from choosing the right solar panels and. In this article, I'll walk you through what you need to know if you're contemplating living in an off-the-grid house that generates its own electricity.
