

# Solar power station for home in mexico

## Overview

---

Historically, the main applications of solar energy technologies in Mexico have been for non-electric system applications for, water heating and drying crops. As in most countries, wind power development preceded solar power initially, due to the lower installation cost. Since solar power is not available during the night, and because wind power tends to be complementary to solar, a mix of both can be expected. Both require substantial to compensate for days with no wind an.
