

Solar water pump installation in Somalia

Overview

Against that backdrop, Somalia has been working with the UNEP Copenhagen Climate Centre on what is formally known as a technology needs assessment. This is the reason why we are introducing a solar water pump in Somalia, which is a mini power house of solar array modules. It can easily run the attached pump and save sum of amount, you spend on electricity every month. Our value engineering, operational and performance monitoring allows us to deliver cost-effective energy for our clients. In Somalia, Sun Aratinga is a leader in energy, water, and floating water pumps. At its core is the idea that technology could be a lifeline for millions across Somalia, where climate change is deepening. In the arid landscapes of the Somalia and Somaliland regions, access to reliable and affordable water is crucial for underserved communities, especially pastoralist groups, who have been profoundly affected by recurring droughts and famines.
