

Swiss wind solar and storage integrated power station

Overview

In 2022, Zurich's Letten District deployed a 60 MWh lithium-ion battery system paired with solar farms and wind turbines. Switzerland is in the midst of the energy transition and has set itself the goal of becoming climate neutral by 2050. Yet at the same time, a secure supply of electricity must be guaranteed. What does this mean for the Swiss grid, and why is flexibility so important?

Operating the grid was much. With its hydroelectric power plants in the Alps and innovative projects, Switzerland is contributing to the search for solutions for the efficient, long-term storage of electricity. I cover climate change and energy through reportages, articles, interviews and in-depth reports. I am interested in. ABB Drives is a global technology leader serving industries, infrastructure and machine builders with world-class drives, drive systems and packages.
