

The small solar panel is not generating electricity anymore

Overview

If your solar panels aren't generating energy, it's crucial to diagnose and fix the problem as quickly as possible. Environmental factors cause 70% of solar production issues: Weather, shading, and dirt accumulation are the most common culprits behind reduced solar output, making regular monitoring and maintenance essential for optimal performance. 8% annually: Quality solar panels. Every second your solar energy system is down costs you money, so it's important to fix your solar panels as soon as you notice your solar panels are not producing full power.
