

US Home Solar Power

Overview

As of early 2025, nearly 5 million households (specifically, 4.7 million) have solar panels installed on their rooftops, according to a SolarReviews report. homes, and the number is expected to climb to 15% by 2030 — about twofold within the next five years. Solar projects are making it easier for Americans to choose solar energy to power their homes. When. Complete Energy Independence is Achievable: Modern solar technology with 21-24% efficiency panels and advanced lithium-ion battery systems can provide 100% energy independence for most homes, even in challenging climates like Seattle where homeowners achieve 98% solar coverage. In the last decade, solar has grown with an average annual rate of 26 percent, reaching a capacity of over 138 gigawatts in 2023. In that same year, solar energy accounted for 55 percent of new electricity-generating. From the neighborhoods of California to the coast of Maine, Americans are cutting utility bills and shrinking their environmental footprint by installing solar panel systems on their rooftops. And 97% of those installations are home rooftop solar panels.
