

# US Wind Power Project Energy Storage

## Overview

---

Solar, wind, and batteries are set to supply virtually all net new US generating capacity in 2026, according to EIA data reviewed by the SUN DAY Campaign, continuing their strong 2025 growth. EIA's latest monthly "Electric Power Monthly" report (with data through Novem), once again. We expect 63 gigawatts (GW) of new utility-scale electric-generating capacity to be added to the U. power grid in 2025 in our latest Preliminary Monthly Electric Generator Inventory report. This amount represents an almost 30% increase from 2024 when 48.6 GW of capacity was installed, the largest. However, the International Energy Agency (IEA) has cut U. renewable capacity growth forecasts by 50% for 2025–2030, citing policy changes under the Trump administration.

## US Wind Power Project Energy Storage

---

### REPORT: US Energy Storage Installations Through Q3 2025 Surpass ...

Overall Q3 installations increased 31% year-over-year, though the market declined 6% compared to Q2 2025's record highs. The utility-scale storage segment drove growth with 4.6 GW ...

## U.S. Grid Energy Storage Factsheet

Electrical Energy Storage (EES) systems store electricity and convert it back to electrical energy when needed. 1 Batteries are one of the most common forms of electrical energy storage.

114KWh ESS

### Solar, batteries, wind to make up 93% of 2025 US electricity ...

The US Energy Information Administration (EIA) projects 32.5 GW of solar, 18.2 GW of energy storage, and 7.7 GW of wind will be deployed this year.

## Apex adds over 625 MW of new wind, storage capacity in US in H1 2025

US renewables developer Apex Clean Energy has brought more than 625 MW of utility-scale wind and battery storage projects online across Illinois, Maine, and Texas, the company said ...

## EIA: 99%+ of new US capacity in 2026 will be solar, wind + storage

Solar, wind, and batteries are set to supply virtually all net new US generating capacity in 2026, according to the latest EIA data.

## Planned Wind Projects in the United States

Here is a map of all utility-scale planned wind projects in United States. Hover over a planned wind project to view information on each project like their name, capacity and construction date.

## Solar, battery storage to lead new U.S. generating capacity additions

In 2025, we expect 7.7 GW of wind

capacity to be added to the U.S. grid. Last year, only 5.1 GW was added, the smallest wind capacity addition since 2014. Texas, Wyoming, and Massachusetts will ...

## 10 US wind energy projects starting in 2026 and beyond

Explore top U.S. wind energy projects launching from 2026, with insights on renewable trends, onshore vs offshore growth, and policy impacts on clean power.

## US Electricity 2025 - Special Report

The US clean electricity transition continued as wind and solar generated more than coal for the first time. Electricity demand growth sped up and solar generation rose more quickly than gas ...

## ONSHORE WIND PROJECTS

Onshore & Offshore Wind generation and infrastructure projects can harness America's abundant resources to support

the clean energy transition. LPO financed  
Shepherds Flat, one of the largest ...
