

# Ukraine wind power energy storage project

## Overview

---

Ukraine is currently constructing over 700 MW of new wind power capacity, along with more than 200 MW of battery energy storage systems (BESS), according to Andriy Konechenkov, Chairman of the Board of the Ukrainian Wind Energy Association (UWEA). "Even more importantly, we have projects already. The European Bank for Reconstruction and Development (EBRD) is supporting Ukraine 's energy security by lending €22. While 2023–2024 were years of survival and frozen investments, 2025 marked a return to large-scale thinking — despite the war, consumption restrictions, and elevated risks. One of the most. Ukraine's solar power plants are growing fast, with plans to build 94 GW of solar capacity by 2050. [1][2] At the end of 2021 there was 1.
