

Victoria electricity market

Overview

The Victorian Essential Services Commission (ESC) released its latest Energy Market Report (EMR) in March 2024. This report took an in-depth look at energy usage, particularly for households experiencing payment difficulty. Victorian electricity and gas markets for competitiveness and efficiency. This edition of the Victorian Energy Market Report highlights the importance of the Victorian Default Offer and consumer protections, and small business customers were higher in 2023-24 than retailers continued to offer the. Change is driven by new technologies that increase the supply of renewable energy; changes to our economy; and increased awareness of our energy use and its economic cost and climate impact. To understand these changes, we need timely, accurate, comprehensive, comparable and readily accessible. Victoria has an unusual energy history in two key areas that are important as we contemplate a net zero future. But that base is rapidly disappearing. This records a decrease from the previous number of 31.750 AUD/MWh from Jan 1999. Our research aims to provide insights into the energy market to promote effective competition and achieve the best outcomes for Victorian energy consumers. Same-name messaging may puzzle consumers. Retailers who have different plans with the same name make switching to the best offer harder.
