## Overview

---

A photovoltaic power station, also known as a solar park, solar farm, or solar power plant, is a large-scale grid-connected photovoltaic power system (PV system) designed for the supply of merchant power. They are different from most building-mounted and other decentralized solar power because they. A solar photovoltaic (PV) power plant is an innovative energy solution that converts sunlight into electricity using the photovoltaic effect. This process occurs when photons from sunlight strike a material, typically silicon, and displace electrons, generating a direct current (DC).
