

Where to check the price of LONGi photovoltaic panels

Overview

LONGi solar panels cost approximately \$3.03 per watt, aligning with the national average and making them a cost-effective choice for homeowners. For an average 7 kW solar system, LONGi installation costs around \$21,210 before federal tax credits, dropping to approximately \$15,000 after credits. LONGi panels deliver exceptional efficiency ratings reaching up to 21%. Their half-cut cell technology allows panels to operate as two separate units, ensuring continued power generation even if one section is shaded. LONGi Solar is a leading manufacturer in the solar PV industry delivering product innovations and optimized power-cost ratio with breakthrough monocrystalline technologies. LONGi supplies more than 30GW of high-efficiency solar wafers and modules worldwide yearly, about a quarter of global market. At the key node of intergenerational transition of global Photovoltaic (PV) technology, the back contact (BC) cell technology is leading the new-generation PV technology paradigm revolution, becoming the core engine to drive industry cost reduction and efficiency improvement and realize energy. With competitive pricing and the potential for significant savings on electricity bills, Longi panels offer an attractive return on investment over time. LONGi was incorporated in 2000 and has focused exclusively on monocrystalline wafers since then.
