

Wind turbine installation construction team

Overview

Our crews provide end-to-end services to the wind farm industry including power collection systems, substations, interconnection services as well as complete EPC/BOP solutions for private developers, electric utilities and government organizations across the country. The Wesson Group is one of the most successful EPC wind energy contractors in the Northeast, with nearly two decades of experience delivering innovative wind power solutions. Let our experienced and highly capable team help you achieve your goals. The BEI team brings together the engineering, electrical, foundation, project management, and implementation capabilities required to execute wind projects. We work closely with our clients to construct efficient wind facilities that generate clean. Wind farms require more than turbine installation—they demand robust civil infrastructure and site preparation to ensure safe, long-lasting performance.

Wind turbine installation construction team
