

# Yamoussoukro flow battery technology

## Overview

---

Next-generation battery management systems maintain optimal operating conditions with 45% less energy consumption, extending battery lifespan to 20+ years. Standardized plug-and-play designs have reduced installation costs from \$85/kWh to \$40/kWh since 2023. Nestled in Ivory Coast's political capital, the Yamoussoukro Energy Storage Power Station represents a transformative leap for West Africa's energy landscape. This 150MW/300MWh facility - comparable to powering 90,000 homes daily - combines cutting-edge lithium-ion batteries with solar. ion, and the liquid flow battery accelerated its landing. All vanadium liquid flow battery is a kind of energy storage medium which can store a lot. Iron-based flow batteries designed for large-scale energy storage have been around since the 1980s, and some are now commercially available. Last March, rolling blackouts during peak demand hours cost local manufacturers.
